***OTHER***

***BICYCLE, PEDESTRIAN AND OTHER IMPROVEMENTS***

**PROJECT SCOPE/DESCRIPTION:** These projects involve the design and construction of pedestrian and bicycle facilities, transit access, park and ride facilities, traffic calming, and other non-motorized transportation projects. Additional projects will be identified over the six-year period.

**PROJECT JUSTIFICATION:** These improvements enhance multi-modal transportation throughout the State and encourage movement of people and goods through other than single occupant vehicles.

***BICYCLE, PEDESTRIAN AND OTHER IMPROVEMENTS (CONTINUED)***

***Del Tech Georgetown SR 18, Seashore Highway, Pedestrian and Bicycle Improvements [Project No. 20-013-05]*** – This project was located on SR 18, Seashore Highway and involved the construction of a five-foot sidewalk and pedestrian crossing adjacent to SR 18, Seashore Highway between Del Tech and downtown Georgetown. A signalized pedestrian crossing was provided across US113 on the eastbound side of SR 18, Seashore Highway and the southbound side of US113. Existing curbing remained from the college entrance to US113.

***East Coast Greenway, New Castle*** – This will connect a section of the abandoned railroad in New Castle to the East Coast Greenway through the area.

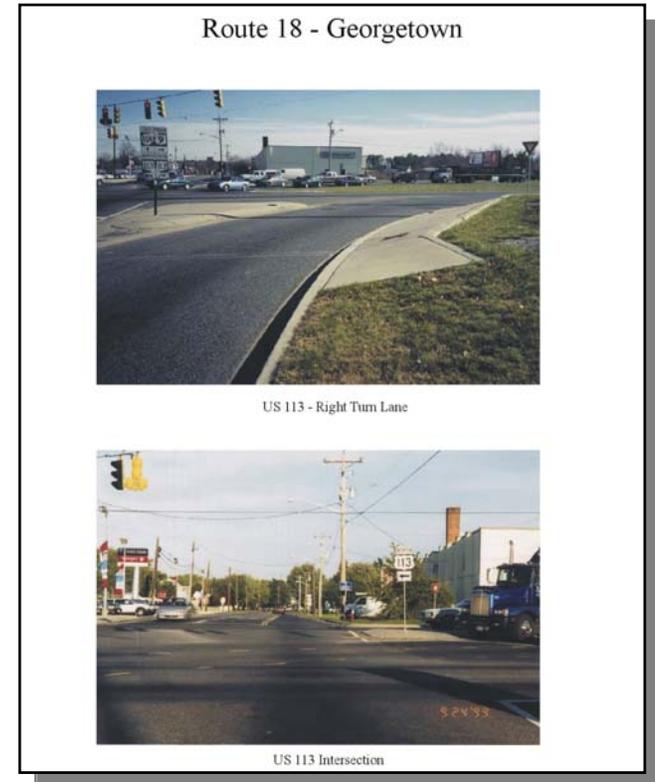

***Georgetown Pedestrian and Bicycle Plan [Project No. 22-017-01]*** – The project development phase was completed in FY 2003 with the recommended improvements to be constructed in FY 2006.

***K104, Kenton Road, K158, Chestnut Grove Road to SR 8, Forrest Avenue*** - The project development phase will determine the need and length of sidewalks needed in this area. This will complete the pedestrian facilities in the area.

***Loockerman Street Bridge and Sidewalk Improvements, Dover*** - The project limits were Loockerman Street from Park Place west to Legislative Avenue, and the work included the repair and/or replacement of the portions of curbing and sidewalk on the north and south sides of Loockerman Street. The brick sidewalks on the Loockerman Street Bridge were uneven and slope toward the street, making it difficult and dangerous, especially for the elderly or mobility challenged, to use. The sidewalks on the north side of Loockerman Street and the curbing on the north and south sides of Loockerman Street were deteriorated, with the section between the bridge and Treadway Tower sloping drastically toward Silver Lake.

***Pomeroy Branch, Pedestrian and Bicycle Facility*** – A pedestrian and bicycle facility will be constructed from the new proposed Newark Train Station location, north through the City of Newark and terminating in White Clay Creek State Park.

***SR 3, Marsh Road Pedestrian Improvements*** – Project development will determine the need to connect all pedestrian facilities along Marsh Road. There are several gaps along this area.

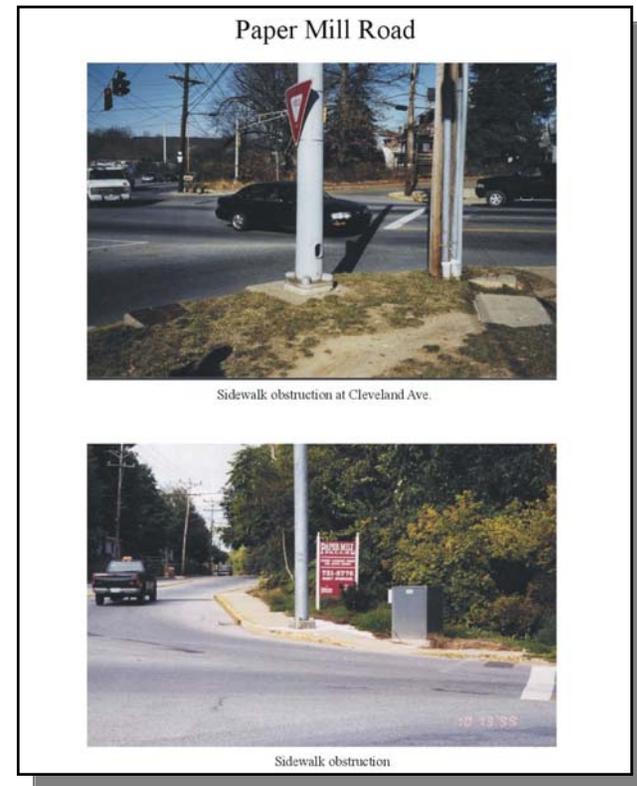

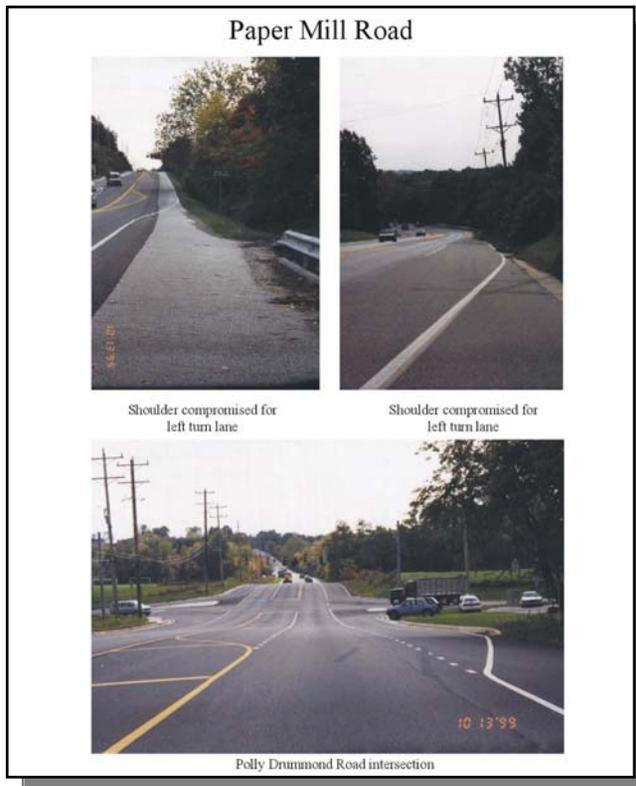

***BICYCLE, PEDESTRIAN AND OTHER IMPROVEMENTS (CONTINUED)***

***SR 3, Marsh Road and N 43, Washington Street Extension, Pedestrian Improvements*** – This project will complete the sidewalk gaps from Mt. Pleasant High School to Marsh Road.

***SR 7, Limestone Road from Arundel to N283, Stoney Batter Road [Project No. 22-011-03]*** – These improvements will include the completion of the sidewalk network from Arundel to Stoney Batter Road.

***SR 72 Bikeway Extension, from I-95 to South of N356, Old Baltimore Pike [Project No. 20-015-03]*** – Improvements included extension of the current off-road bikeway from I-95 to Dayett Mills entrance with a fence barrier between the industrial parking and the bikeway extension. A pedestrian signal and crosswalks were installed at N356, Old Baltimore Pike and SR 72 intersection.

***SR 72, Paper Mill Road, Newark from Cleveland Avenue to N324, Ebenezer Church Road [Project No.'s 20-011-01 and 21-011-01]*** – Improvements will include widening at intersections for bicycle lanes and installation of pedestrian crossings at Cleveland Avenue, Possum Park Road, and N324, Ebenezer Church Road. The road will be resurfaced as part of this project. This project is currently under construction.

***BICYCLE, PEDESTRIAN AND OTHER IMPROVEMENTS (CONTINUED)***

***SR 72, Wrangle Hill Road from N256B, McCoy Road to SR 71, Red Lion Road*** – Sidewalks will be constructed along this roadway.

***SR141, Ferris Road/SR 2, Kirkwood Highway, Prices Corner Pedestrian Improvements [Project No. 21-011-03]*** – Improvements included construction of a new pedestrian facility on Kirkwood Highway and Centreville Road to provide safer travel for pedestrians and transit customers. Specific improvements were construction of sidewalks, a signalized pedestrian crossing at the intersection, median modifications, landscaping, and crosswalk striping.

***SR141, Ferris Road/SR 2, Kirkwood Highway***

***SR261, Foulk Road Pedestrian Improvements*** – Project development will determine the need to connect all pedestrian facilities along Marsh Road. There are several gaps along this area.

***US 13 and Roosevelt Avenue, Pedestrian Crossing Improvements, Dover*** – This will allow a safe crossing for pedestrians across this heavily traveled section of US 13.

***US 13 and Roosevelt Avenue, Dover***

***BICYCLE, PEDESTRIAN AND OTHER IMPROVEMENTS (CONTINUED)***

***US 13 from Delaware State University to Smith Street and US 13 from North of Smith Street to Denney's Road*** – This will complete the system of sidewalks on the northbound and southbound sides of US 13 from Loockerman Street to Denney's Road.

***US 13 from South Court Street to Loockerman Street*** – This will complete any open areas on US 13 from Court Street to Denney's Road and all safe pedestrian movements along the highway.

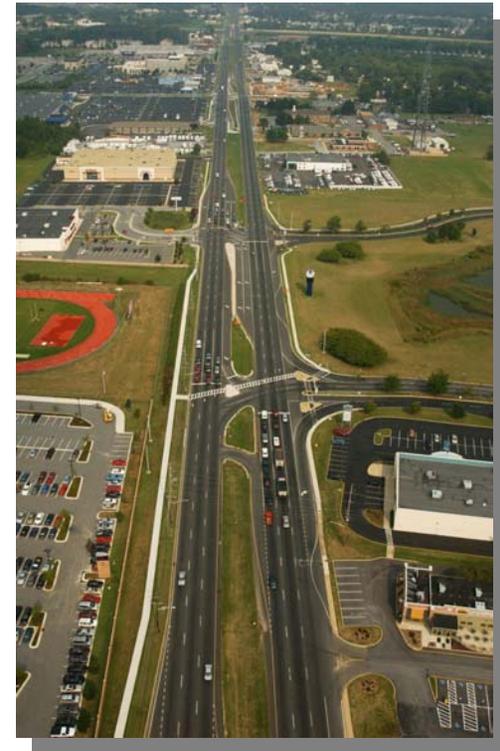

***US 13 from South White Oak Road to Townsend Boulevard and US 13 from Loockerman Street to Division Street [Project No. 20-012-01]*** - Improvements will include installation of sidewalks on US 13 northbound and southbound from Loockerman Street to Division Street, and US 13 northbound and southbound from White Oak Road to Townsend Boulevard. Work will also include curb replacement and minor drainage improvements.

***US 13 from Townsend Boulevard to Delaware State University*** – The next phase of the above project began constructed in FY 2004.

***US 13 Near Townsend Boulevard***

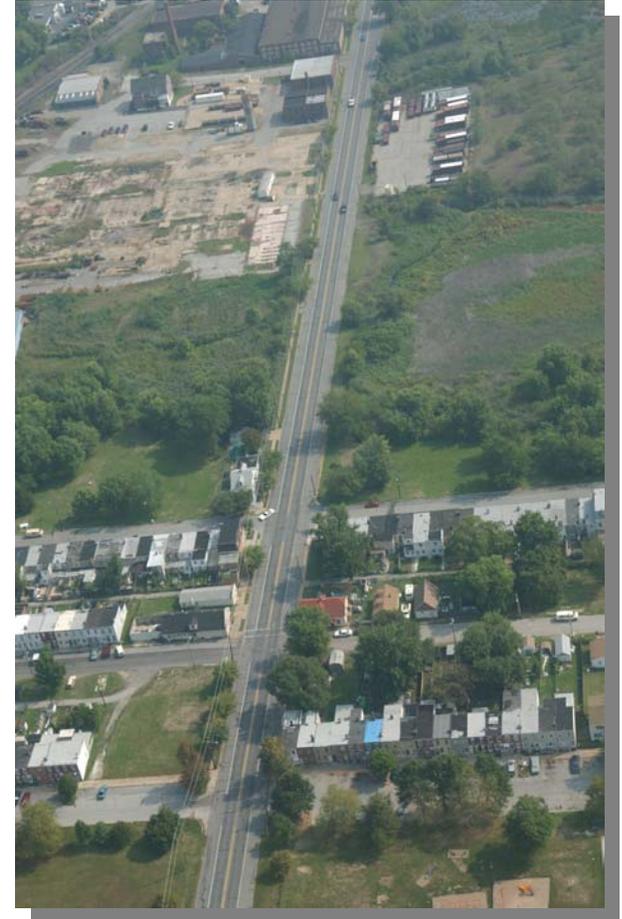

***US 13 at Delaware State University  
Looking North Towards Denney's Road***

***BICYCLE, PEDESTRIAN AND OTHER IMPROVEMENTS (CONTINUED)***

***Washington Street, New Castle from SR273, Frenchtown Road/SR141, Basin Road to SR 9, Sidewalk and Intersection Improvements [Project No. 22-011-04]*** – The improvements will include sidewalks along Washington Street and continuing onto SR 9. Safety and intersection improvements at the SR 9 intersection will also be analyzed.

***Webb's Lane, New Burton Road to US 13A [Project No. 22-012-01]*** – The improvements will include pedestrian, bicycle and safety improvements.

***SR 9 South of New Castle***

***ENVIRONMENTAL IMPROVEMENTS*****PROJECT SCOPE/DESCRIPTION:**

***Wetland mitigation*** monitoring requirements typically include 20-year site management/assessment to assure successful creation of wetland resources developed as compensation for various capital projects. Monitoring typically requires monthly hydraulic data collection, fall site sampling for vegetation assessment, annual reports for five years and then summary reports at the 10, 15 and 20-year marks. The funding estimate also includes a contingency for site remediation that may include: additional fertilization, seeding, planting and site re-grading as necessary to assure the establishment of a viable wetland plant and hydrologic characteristics.

***Specific mitigation projects now underway include:***

- SR 1 Dover – Smyrna, nine individual sites, 324 acres, seeding/monitoring
- Ogletown mitigation, three sites, 18 acres, final planting, monitoring
- N 90, First State Boulevard, one site, 2.5 acres, monitoring/fertilizing
- US113 Georgetown to Milford, one site, 100 acres, monitoring
- SR 1 northern segments, seven sites, 160 acres, monitoring
- K294, Scarborough Road, one site, six acres, monitoring
- N400, Porter Road, one site, 12 acres, monitoring
- SR 48, one site, 1.6 acres, monitoring
- SR 92, Naamans Road, five sites, one acre, monitoring

***Eskridge Wetland Site***

***ENVIRONMENTAL IMPROVEMENTS (CONTINUED)***

*A contingency for environmental remediation* is also provided for unforeseen environmental problems to be addressed as they are identified.

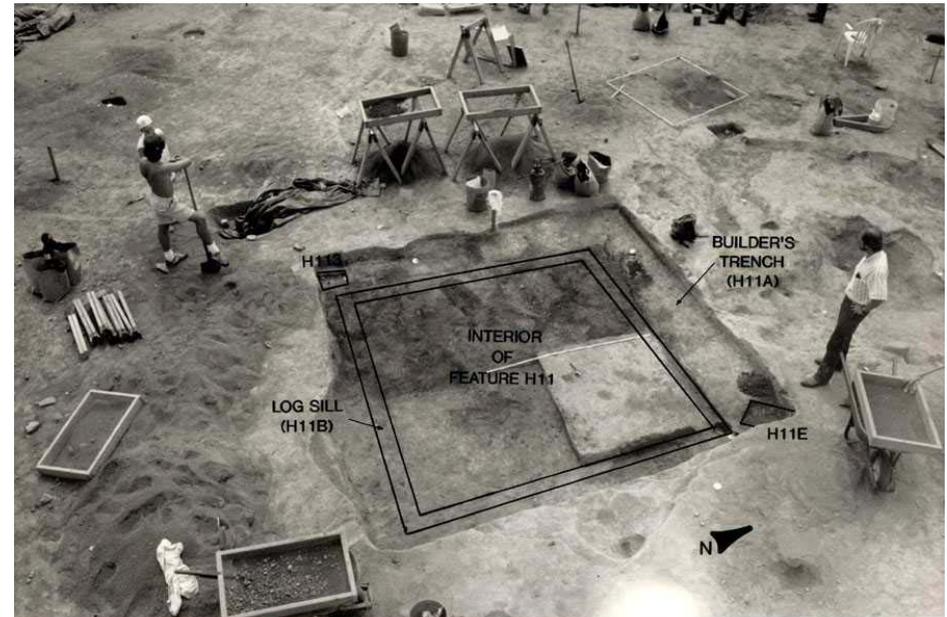

*Archeological* data analyses and report preparation timeframes frequently extend beyond completion of the capital project for which the archeological compliance was mandated. This project element provides for: data analysis, report preparation, publication and a contingency for follow through with human remains notification and reburials associated with this requirement. Current specific archeological elements include:

- Ogletown Interchange
- US113 Georgetown to Milford
- SR 1 southern segments
- N400, Porter Road

**PROJECT JUSTIFICATION:** The department must comply with environmental and cultural laws and regulations as projects are implemented.

***Example of an Archeological Investigation***

***INTERSECTION IMPROVEMENTS***

**PROJECT SCOPE/DESCRIPTION:** These projects involve the identification, design and construction of operational and safety initiatives and improvements through strategic planning, or the installation or modification of traffic control (signal) systems and devices.

**PROJECT JUSTIFICATION:** These improvements are identified by DelDOT's Traffic Section to improve the operation, mobility and safety of the traveling public and reduce congestion.

***MATERIALS AND MINOR CONTRACTS***

**PROJECT SCOPE/DESCRIPTION:** This request expands the capability of the operating districts to maintain the state's roadways through the development of unit price contracts for small to medium sized projects. Examples of capital repairs and minor improvements that would be funded by this program include: contracts for adding minor turn lanes at intersections; concrete pavement repairs; repair/replacement of curbs; gutters and sidewalks; traffic control devices (including those necessary for pedestrian, transit, and bicycle access); rotomilling; crossover modifications; guardrail installations and drainage improvements. Annual unit price contracts are issued for various types of work to quickly address specific needs as they are identified. These are projects and programs which require no acquisition of right-of-way; minimal design; no location and/or environmental studies or permits; and are administered by the maintenance districts. As stand-alone projects are identified, they will then be listed as separate projects in the Capital Transportation Program.

In addition, necessary replacements of sign structures, high mast lighting and traffic signal replacements as identified by the Sign Structure Inspection Program are funded through these contracts.

**National Pollutant Discharge Elimination System (NPDES):** The department, and other entities operating stormwater discharge systems in northern Delaware, must meet the requirements of the Federal Water Pollution Control Act (FCWA) with regard to discharges from these systems into federally protected waterways. Most of the requirements relating to satisfying this mandate relate to the proper maintenance and operation of the existing stormwater discharge system. Capital funding, however, has also been set aside to address needed repairs that fall outside the scope of the operating budget. The department reports to the Legislature quarterly on the status on this program, with a specific emphasis on expenditures.

**PROJECT JUSTIFICATION:** Funding permits minor capital problems to be addressed throughout the year at the maintenance district level. In addition, the department must comply with environmental laws and regulations that mandate proper maintenance of storm water discharge systems.

**PAVING PROGRAM**

**PROJECT SCOPE/DESCRIPTION:** This program consists of major pavement rehabilitation and pavement resurfacing of state maintained roadways (except for the Community Transportation Fund program).

**Surface Treatment:** On less traveled roadways, mostly in Kent and Sussex Counties, the road structure is preserved by a coating of tar, and then overlaid with stone. This treatment, in general, lasts seven years. Specific locations are identified annually after the spring inspection.

**Surface Treatment Conversion:** As areas are developed or surface treated roads become more heavily traveled, they are converted to a two-inch hot-mix overlay surface. Specific locations are identified annually after the spring inspection.

**PROJECT JUSTIFICATION:** These projects are necessary in order to maintain a road inventory that does not become deficient and to improve deteriorating pavement conditions throughout the State.

	<b>FY 2006</b>
Emergency Paving from Major Storm Damage	\$1,000,000
New Technology and Inspection	849,000
Other Paving and Patching	4,000,000
Pavement Rehabilitation	11,824,000
Pavement Resurfacing	31,176,000
Surface Treatment	1,500,000
Surface Treatment Conversion	2,000,000
SR 1, Tybouts Corner to SR273	1,000,000
<b>Total</b>	<b><u>\$53,349,000</u></b>
